PROFILE

I'm an undergraduate Computer Science student, specializing in Artificial Intelligence field. An enthusiastic individual who is committed in creating a meaningful impact while learning and collaborating with diverse teams to deliver innovative solutions in the field. I'm currently seeking a data scientist or related position to further develop my skills and solve a real world problems.

EDUCATION

BINA NUSANTARA UNIVERSITY — Jakarta, Indonesia
Bachelor of Computer Science — 2022 - 2026
Major in Computer Science
Cumulative GPA (July 2024): 3.81/4.0

PERMAI HIGH SCHOOL — Jakarta, Indonesia
Natural Science — 2019 - 2022
Score: 85.01/100.00

WORK EXPERIENCE

SCIFI RECAPPED YOUTUBE CHANNEL
Part Time Video Editor — Sep 2021 – May 2022

- Helped growing the Youtube channel in a team to reach more than 400.000 subscribers.
- Precisely choosing a movie scene that doesn't violate the Youtube rules while maximizing audience's satisfaction.

ACTIVITIES

BINUS BLOCKCHAIN AND CRYPTO CLUB — Jakarta, Indonesia
Research and Development Staff — Sep 2024 – Present

- Analyzing actual data and news for news content on BBCC social media
- Searching and developing new technologies or ideas to be implemented inside BBCC.

DATA SCIENCE CLUB BINUS — Jakarta, Indonesia
Education and Development Activist — Jul 2023 – Feb 2024

- Providing a learning materials that will be given to DSC members during the monthly class.
- Working in a team to ensure the monthly class to run effectively.

PROJECTS

MONKEY POX PREDICTION USING MACHINE LEARNING
Developed a model to classify the presence of monkey pox given a symptoms from the tabular dataset from Kaggle. The ML models were deployed using streamlit framework, which allows users to input symptoms through the interface and receive the classification result immediately.

SPEAKER RECOGNITION
Created a speaker recognition model with machine learning (SVM and XGBOOST) and a deep learning model (RNN). The dataset was built by combining student voice data and voice data from Kaggle. The final model is able to recognize and classify whose voice it belongs to.

SENTIMENT ANALYSIS ON AMAZON PRODUCT REVIEWS
Developed a sentiment analysis models from a textual dataset using XGBOOST and BERT model to classify sentiment from customer review texts.

ADDITIONAL

Technical Skills: C, C++, Java, MySQL, Python, Pandas, Matplotlib, Scikit-learn, TensorFlow, OpenCV, NLTK, Git, GitHub.
Languages: Bahasa Indonesia, English.
Certifications & Training: Building Transformer-Based Natural Language Processing Applications, Fundamentals of Deep Learning - NVIDIA DLI; Machine Learning with Python, Python 101 for Data Science - Cognitive Class
