## Profile

I am an undergraduate Computer Science student, specializing in Artificial Intelligence field. An enthusiastic individual who is committed in creating a meaningful impact while learning and collaborating with diverse teams to deliver innovative solutions in the field.

## Experience

### RESEARCH AND DEVELOPMENT STAFF | BINUS BLOCKCHAIN AND CRYPTO CLUB | SEPT 2024 – PRESENT

- Analyzing actual data and news for news content on BBCC social media.
- Developing new technologies or ideas to be implemented in BBCC.

### EDUCATION AND DEVELOPMENT ACTIVIST | DATA SCIENCE CLUB BINUS | JULY 2023 – FEB 2024

- Providing a learning materials that will be given to DSC members during the monthly class.
- Working in a team to ensure the monthly class to run effectively.

### YOUTUBE VIDEO EDITOR | SCIFI RECAPPED | SEPTEMBER 2021 – MAY 2022

- Helped growing the Youtube channel in a team to reach more than 400.000 subscribers.
- Precisely choosing a movie scene that doesn't violate the Youtube rules while maximizing audience's satisfaction.

## Education

### BACHELOR OF COMPUTER SCIENCE | BINUS UNIVERSITY, JAKARTA | 2022 - PRESENT

Cumulative GPA (July 2024): 3.81/4.00

### NATURAL SCIENCE | SMA PERMAI, JAKARTA | 2019 - 2022

Score: 85.01/100.00

## Skills & Abilities

- **Language**: Bahasa Indonesia, English.
- **Programming**: C, C++, Python, Java.
- **Database**: MySQL.
- **Artificial Intelligence**: Machine Learning, Deep Learning, Speech Recognition, Computer Vision, NLP.
- **Data Science Tools**: Pandas, Matplotlib, Scikit-learn, Tensorflow, OpenCV, NLTK, Github & other tools.

## Certifications

- Building Transformer-Based Natural Language Processing Applications | *NVIDIA DLI*
- Fundamentals of Deep Learning | *NVIDIA DLI*

- Machine Learning with Python | *Cognitive Class*
- Python 101 for Data Science | *Cognitive Class*

## Projects

### MONKEY POX PREDICTION USING MACHINE LEARNING

Developed a model to classify the presence of monkey pox given a symptoms from the tabular dataset from Kaggle. The ML models were deployed using streamlit framework, which allows users to input symptoms through the interface and receive the classification result immediately.

### SPEAKER RECOGNITION

Created a speaker recognition model with machine learning (SVM and XGBOOST) and a deep learning model (RNN). The dataset was built by combining student voice data and voice data from Kaggle.

### SENTIMENT ANALYSIS ON AMAZON PRODUCT REVIEWS

Developed a sentiment analysis models from a textual dataset using XGBOOST and BERT model to classify sentiment from customer review texts.
